Work Experience

whatsyouraverage.com — Drop shipping e-commerce platform

- Leverages playwright and Chakra-UI to generate a png that is then sent to Printful
- A combination of Printful's webhooks and Sendgrid take care of automating the shipping/transactional email process

[Repo](#)

[Storyline.digital](https://storyline.digital) — Multimedia blog/brand

- Took a Jamstack approach to content management. Live page previews and more modular schema enabled by Next, Sanity and Vercel as the CDN
- Made heavy use of GROQ for image metadata to leverage Sanity's blurred base64 placeholders and inferred background colors.

[Repo](#)

truetacolondon.com — e-commerce for a local eatery

- Leveraged Sanity to provide a non-technical content editing experience for menu items and pricing
- Implemented Stripe's API with the frontend using serverless functions and client-side SDKs
- Integrated an automated "e-chit" workflow for fulfilling orders utilizing Stripe webhooks and Mailgun

[Repo](#)

xandydandy.com — Personal site

- Built with Next, Sanity, and MDX to handle site content and garden posts
- Integrated a cohesive design system across the site using Chakra-UI 1.x
- Landing page built with R3F (React renderer for threejs)
